Agency:

**CDPHE** 

Purpose of Contact: Completion of the 600-4 Hotspots Remediation

## Discussion

Plutonium exceeded the WRW action levels at two locations within IHSS Group 600-4; at sample location CA37-013, and at historical location SS441294. The remediation of these two hotspots at IHSS Group 600-4 was recently completed. Confirmation samples were collected from the four sides and the bottom of each excavation and all results are well below action levels. The hotspots were previously backfilled at risk based on the screening results because of the heavy use of this area for waste staging and shipment.
